

## SERVICE OF MEDAL ENGRAVING

Through the race number and the chip of every participant, we can obtain the real time of every runner in real time, so when they finish the race and once they received the MEDAL, all that participant who has requested the service of engraving, paid in advance at the web or in the Expo sport, and just showing the race number, his NAME and TIME REALIZED will be engraved.

If you engage the medal engraving when you make the inscription, when you go to the Expo Sports to take your bib number on Friday and Saturday prior to the race, **you must go to the stand of medal engraving, located in the bib number collection area**, to get a sticker that you must show the day of the race to be able to engrave your medal. **Remember that without this sticker you cannot engrave the medal.**

The company only makes the service of medal engraving during the Zurich Maratón San Sebastián, that is, the same day of the race. All those runners who have bought the service, they must **know that they will not engrave medals after the event.**

The estimated time to engrave is between 2 to 3 seconds per engraving.
